

RINK COMPANY MAKES PLANS FOR WINTER

Irvin Young, Appointed Caretaker—
Will be Skating Soon if Cold
Weather Continues

Holding their annual meeting last Friday evening in W. K. Webb's office, the Barabano Curling and Skating Rinks Limited chose directors and mapped out plans for the coming season of curling and skating. The directors for the year are: A. McKee, president; W. L. Paganas, vice president; W. K. Webb, secretary; treasurer, J. H. Miles, Roy Smith and M. R. Milroy.

The directors hope to have skating ice ready as an early date if the cold weather continues. Irvin Young, who has been rink caretaker for the past couple of seasons, was again appointed to this position.

Skating fees will be the same as last winter, with the following rates in force: season ticket for family \$5.00, men's ticket \$2.00, ladies \$1.00, children \$1.00; single admission for adults \$2.00, children 10c.

A schedule for skating hours, and hours for hockey games and practice is to be drawn up and will be rigidly enforced.

Some plans were made for financial arrangements with the curling club. In regard to curling for boys of high school boys, a suggestion was made that the boys be allowed to curl Saturday afternoons. Definite arrangements have not been made, but the matter will be discussed later.

Improvements to the rink this winter include a new skating rink at the skating box of the hockey rink; papering of the curling rink building. The new skating rink has already been installed, and repairs to the fence have been made. It is proposed to put a large gate in the skating rink enclosure so that a team of horses may be brought inside the rink to clean off a heavy snowfall.

The rink company is looking forward to a good season, and with the new hot water sprinkling system they expect to provide excellent ice at all times winter permits.

Wheat Growers Face Outlook That Gives But Little Cheer

Prominent features of the world wheat situation as it has developed this year are: record world carry-over last year; increased production in Europe; very low production in North America; possibilities of an average production in the southern hemisphere, with a total yield less than last year; prospects of a small crop year; indications of a decreased carryover at the end of the crop year. On the whole, progress being made towards clarifying the wheat situation is slow and unless the International Wheat Agreement is fully implemented with regard to wheat acreage restriction, a decided trend for the better is expected in affairs in general with consequent upturn in world trade prospects do not look any too bright.

The boom in North American grain markets late spring and early summer with soaring prices for paper wheat had one very distinct result: it effectively curtailed wheat exports from Canada. The result was a carryover of 215 million bushels. The United States carryover totalled 285 million bushels, compared with 364 million the previous year or a gain in the year of 89 million bushels. The Food Research Institute of Stanford University, recognized the carryover of wheat in the world as the largest on record and an increase of 196 million bushels over the previous year.

Europe has another record-breaking crop year, the estimate of production being 1,315,744,000 bushels, or in round figures, 125 million bushels more than last year. The increased production came largely from Canada, which produced 285 million bushels, compared with 215 million the previous year. The Food Research Institute of Stanford University, recognized the carryover of wheat in the world as the largest on record and an increase of 196 million bushels over the previous year.

In North America, total production in Canada, the United States, and Mexico totalled 89 million bushels this year, the lowest for many years and a decrease of 361 million bushels from last year's production. United States production of 215 million bushels was 21 million less than last year's production of 232 million bushels was 172 million less than last year.

In the southern hemisphere production will probably be less than last year, but it is a little early yet to accurately estimate. Next month is the critical period among the wheat fields of Argentina and Australia, when the grain will be filling. Both countries experienced serious drought early in the crop season but liberal rainfall occurred at a critical time and changed the entire outlook. Right now wheat in Argentina and Australia is in the hands of the weather, and it is a little early yet to accurately estimate.

The present estimate of the aggregate 1933 production of wheat in Canada, United States, Australia and Argentina is 116 million bushels as against 162 million bushels last year, and the Food Research Institute of Stanford University, recognized the carryover of wheat in the world as the largest on record and an increase of 196 million bushels over the previous year.

In the far east good wheat crops are reported as general. China's production is estimated as 10 per cent larger than last year, Japan as 20 per cent larger, the greatest increase in wheat production. Russia is reported to have produced a fairly good crop in volume.

Prospects for a large international trade in wheat are not bright. The International Wheat Conference fixed the volume at 560 million bushels, the lowest for many years. The estimate of 512 million bushels for the lowest for many years. The estimate of 512 million bushels for the lowest for many years.

HUSSAR NEWS

HUSSAR, N. 1.—The regular meeting of the W. L. at the home of Mrs. E. J. Bell on Thursday afternoon took the form of a display of horsemanship and old style of clothing. The roll call was answered by family members, which ranged from the proper time of the moon to plant vegetables, warnings of death in the family, to fullness of horses and dogs. Mrs. E. J. Bell gave a paper on "Hussarism," emphasizing the importance of the Hussar in the past, and the importance of the Hussar in the present.

CURLERS WILL MEET FRIDAY

Enthusiasts of the "curler" game will gather Friday evening at the home of W. K. Webb at 1100 Clark St. for the annual meeting of the Barabano Curling Club.

Officers will be elected, slips chosen, method of making up the club decided, and other matters will be taken up. Last season was a very successful one for the club on the outstanding feature being the defence of the MacDonald Cup against Invading rinks from other clubs. The Barabano club has held undisputed possession of the cup for two seasons, and the curlers hope to lengthen on the way of this big trophy in Barabano. It is expected that challenges will come in from Calgary and elsewhere as soon as the curling season opens.

Everybody interested in curling is invited to the meeting Friday night.

ROYAL SCOT VIEWED BY INTERESTED CROWD

The Royal Scot, crack train of the London, Midland & Scottish Railway, attracted several hundred spectators last Monday evening when it stopped at the station in Barabano.

The British train is said to be a marvel of a locomotive, and a triumph of its builders. The locomotive is a 4-6-2 type, and is the fastest of its kind in the world.

TODAY'S TREND IN AGRICULTURE

The day of high priced wheat, which was sold, is over. It is a fact that some years to come, European countries and Canada will be the main sources of wheat for the southern hemisphere, are growing large quantities of wheat. Production has decreased considerably, and the great problem today is to sell what we grow. There are no buyers and sellers are numerous.

Faced with this situation, the irrigation farmer must turn away from wheat growing and raise a product which will give him a steady cash return.

We see this change taking place today. It started a few years ago with the introduction of what is known as the lamb feeding scheme.

In the fall, sheep owners place their lambs with irrigation farmers who have an abundance of feed. The lambs are fed through the winter, and are sold in the spring, and the farmer shares in the profits of increased wool.

From its inception the scheme was well received, and increased in popularity until it has attracted ten thousand lambs will be fed on the eastern irrigation project.

From reports we have gathered it has been learned that the irrigation farmer makes a fair profit in lamb feeding. Grain and fodder which would bring him only a few cents return if sold, yield a greatly increased return if used in lamb feeding.

It is specialized branch of agriculture such as this that the irrigation farmer must look to in the future. His farm is particularly adapted to specializing, and he must become a specialist in some branch of the industry, whether it be as a sheep man, poultry raiser, hog raiser, dairyman, or market gardener and fruit grower.

To become a specialist is no easy matter. It cannot be done overnight. It will require study, hard work, and the ability to adapt to the changing conditions of the market.

But the lamb feeding scheme has shown the irrigation farmer that he can do in the way of specializing, and from the results obtained so far it appears that specializing brings greater returns than straight grain growing.

It is a question whether, under present price conditions, the lamb feeding scheme will return the irrigation farmer sufficient profit to pay his overhead or annual premium on his land contract, interest, water rental, taxes and operating expenses.

It is also a question whether lamb feeding could be practiced by every farmer on the project, and the danger of "over production" (which we hear so much about) is a possibility.

At any rate, the lamb feeding venture is proving interesting, and more profits than straight grain growing. It is an indication of the trend toward specializing on the irrigation project.

To The Road

Isaac Watts, as a boy, acquired the habit of answering questions in rhyme. This plagued the family, and his father finally threatened punishment if the "foolishness" didn't stop.

Soon young Isaac repeated the offense, and sure enough, the rod was produced. Young Isaac dropped to his knees and pleaded, "Oh, father, on my mercy take, and I will no more verse make."

Catty

"This new dog we have at the house for a pet is just like one of the family."

Which one?

Well supplied

A motorist stopped at a wayside general store and inquired of the rustic proprietor:

"What have you in the shape of automobile tires?"

"In the shape of automobile tires I have funeral parlors, hair salons, servers, invalid cabbies and doughnuts," was the quick reply.

A Happy Saturday Night

A small boy accompanied his mother to the country for a weekend. "Where will the father be?" he inquired upon their arrival at the farm.

"There is no bathroom in our house," replied the hostess. "Believe me, this is going to be a real holiday!"

His Alibi

Amanda Hookins, wife of the latest news in South Carolina, was discovered by a neighbor finding her husband as he lay on his back.

"Am Sam sick?" ventured the caller.

"Not 'sactly,' replied Maady in a whisper. "He 'er made a mistake. 'Dar ain't no exercise for him." "Oh, woman, what only exercise he git an walkin' in his sleep, he ain't walked for two nights."

Silver and Gold

Willie: "Pa, what is a politician?" Father: "Pa, a politician is a human machine with a wagging tongue."

Wanted: Barney

Toronto: "This a fine lad ye have here. A magnificent hand and noble features. Could ye lend me a couple of dollars?"

Pat: "I could not. 'Tis my wife's child by her first husband."

That Fellow

"The world's round, isn't it?" "Supposed to be, but I don't know."

"Well, if I wanted to go east, I could eventually cross the globe, couldn't I?"

"Yes, what are you, a taxi driver?"

IN CANADA

THIRST

"What's worse than thirst?" asked the temperance lecturer. "Thirst," was the feeble reply from an uneducated member of his audience. No doubt, this lecturer's thirst had become dry and he was thirsty for a cool drink; he was thirsty.

This sensation which we call thirst is a signal that the body is in need of more fluid. The secretion of saliva decreases in sympathy with a general loss of body fluids; the thirst is not fabricated; the body needs more fluid in order to perform its functions properly.

The best and simplest way to overcome by chewing anything which causes an increase in the flow of saliva. This does not, of course, relieve thirst, but it does, for a time, overcome the sensation of dryness of the throat arising from thirst. The demand for fluid should be heeded when it makes itself felt, because, at this time, the body really needs more fluid in order to perform its functions properly.

The best and simplest way to quench thirst and to provide the body with the fluids it needs is by drinking water. It is unwise to drink quickly large amounts of cold water. Cold water should be sipped; this allows for its pleasant coaction to be felt in the stomach.

What the individual drinks is largely a matter of habit, and if the individual prefers to add something to the water, there is nothing wrong in doing so. The use of fresh fruit beverages supplies not only a pleasant way of quenching thirst, but also of securing minerals and vitamins in abundance.

Much of the fluid required by the body is secured from our foods which contain a large percentage of water. Milk is almost ninety per cent water, and so is most other food. It is generally agreed that most people do not use enough water, and that many would enjoy better health if they drank more water. No one can lay down rules for the quantity of water which each individual should drink, because weather, and the degree of physical activity play a part in it. We suggest a glass or two of water upon rising and between meals, as the average requirements, this to be supplemented

ed in warm weather and following physical activities.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered, generally by letter.

WINTER HUNGER FOR FISH

Experiments conducted at the Dominion Experimental Fisheries Research Station, St. John's, Newfoundland, show conclusively that compensative winter shelter for winter fish is unnecessary.

A test was conducted at this farm in which a small, glass-roofed cage was built with straw and a rough outside constructed of poles and wire mesh used for the roof. The cage was built upon a wooden platform and was exposed to all winds. The cage was divided into two parts, one for the fish and one for the water. The fish were placed in the cage and the water was kept at a constant temperature. The fish were fed and the results were recorded.

A second test gave similar results. The cage was built upon a wooden platform and was exposed to all winds. The cage was divided into two parts, one for the fish and one for the water. The fish were placed in the cage and the water was kept at a constant temperature. The fish were fed and the results were recorded.

At the experimental farm all breeding and stocking ponds are wintered over in small tanks covered with straw. The cages are covered with straw and kept warm by the heat of the fish. The cages are divided into two parts, one for the fish and one for the water. The fish are placed in the cage and the water is kept at a constant temperature. The fish are fed and the results are recorded.

The Quality Store

WHEAT

When (Polen) Placed in Germany, Speculation Banned
 Germany has fixed prices for bread grain and flour in order to prevent speculation of Berlin and Breslau have been suppressed. German farmers are being organized into co-operative intended to "free" the agricultural from dependence on the market to place the agricultural industry outside the capitalist system.

Russian Wheat Reports

Not Heavy
 Russia continues to export a comparatively small volume of wheat, about the same as last year. The poor quality of the wheat from that country militates against its sale on foreign markets.

Plans for Elevator System in Argentina

The Argentinean congress has passed legislation providing for the building of a complete system of grain elevators to cover the republic and to be operated as a public utility. A grain act providing for the grading and classification of grain on the Canadian plan was also introduced.

Predicts Higher Wheat Prices

Hon. H. H. Stevens, minister of agriculture, predicted an improvement in wheat prices in the near future, during a speech delivered at Wadena, Sask.

CROWFOOT NEWS

CROWFOOT, Nov. 1.—The chinook last Saturday and Sunday was very welcome and cars were seen buzzing around again.

Big Rodbourne was a business caller in Crowfoot last Wednesday, going over to bring the cattle home.

Mrs. Hoffbauer is spending a few days in Crowfoot, visiting friends. Quite a number from this vicinity motored to Estevan last Saturday evening to hear E. J. Garland, M. P. lecture of the C.C.P.

Tom Mullin was a business caller in Bassano last Thursday.

Miss Miller is spending a few days in Crowfoot, visiting friends. Mrs. E. Brooks.

Mr. and Mrs. P. Heineken and family have moved on the Schiffer place for the winter.

Bill and Kye Methany shipped a carload of farm machinery to Peace River country where they have taken up housekeeping. They left last Monday.

Mr. and Mrs. M. H. Gamble and family, of Crowfoot, and Mrs. P. Hottel and family and Howard Lawton, spent Sunday visiting Mr. and Mrs. E. W. Campbell.

Mr. and Mrs. A. E. Hansen and Kyo spent Sunday visiting Mr. and Mrs. G. Knudsen, of Bassano.

BIRTHS

The following births have been recorded at the Bassano Hospital:
 A son, to Mr. and Mrs. A. H. Maurer, Bassano, on Friday, Oct. 27.
 A son, to Mr. and Mrs. R. H. Taylor, Bassano, on Monday, Oct. 30.
 A son, to Mr. and Mrs. W. H. Steinbach, Bassano, on Wednesday, Nov. 1.
 A son, to Mr. and Mrs. N. V. Tait, Rosemary, on Thursday, Nov. 1.
 A son, to Mr. and Mrs. J. J. Dyck, Duck Lake, on Thursday, Nov. 2.

MARRIAGE

Miss Bernice Dorothy Russell, of Queensdown, was married to Mr. Hugh Baerman White, of Mayville, on Thursday, Oct. 28, in the Presbyterian Church, Bassano. Rev. John Hart performed the ceremony. Miss M. E. Wack and Mr. S. J. Francis acted as bridesmaids. A few other friends were present, including the mother of the bride.

Jess and George Morrison were awarded second prize in the C.P.R. garden contest in this division. The Morrises had a splendid garden. Last year they won first prize in the classification of "new gardens," taking second this year in "old gardens."

Mr. and Mrs. J. A. Wright and baby son, of Nohelwood, arrived in Crowfoot last week-end with Mr. and Mrs. T. N. Simpson.

Miss Winifred Playfair, who is attending normal school in Calgary, was home for the week-end.

COUNTRESS NEWS

COUNTRESS, Nov. 1.—Charlie Bith and Sam Henderson were visiting around Crowfoot last week-end.

Mrs. M. H. Gamble entertained a number of Countess children, 20 in honor of Donna's 13th birthday. The children enjoyed games and sang delicious refreshments were served.

A change is to be made soon in the Countess mail service. L. Storden, Gen. postmaster and merchant, who delivers Countess mail, will be replaced by Mr. and Mrs. T. N. Simpson.

The C.G.T. entertainment and dance last Friday evening was a splendid success. A large crowd attended the affair, including many from Rosemary, Gen. Lathorn, and other places. The girls realized a profit of \$300, which will be used to purchase equipment.

Meats, Sausage, Metatosh, Sausage, and Miss McRoberts enjoyed another good time at the Thompson home on Thursday last.

Mr. and Mrs. Gamble and family spent last Sunday visiting with Mr. and Mrs. E. W. Campbell, of Makepeace.

Old Rodbourne spent a few days at the Cowan home last week.

Archib. Anderson, who has been working at the Matlock farm, will spend the winter at the Robson home in the Wintertown Hills.

Mr. and Mrs. E. R. Heide will spend the winter with Mr. and Mrs. D. D. Benjamin last Sunday.

Irene Sorensen has returned home from the Bassano Hospital. She is much improved, and expects to return to school soon.

Mr. and Mrs. Robt. Williamson and Mrs. Callison, of Gen. also Mr. and Mrs. Ralph Robson and Mr. and Mrs. D. C. Portney, were among those who attended the C.G.T. concert and dance last Friday.

Miss McRoberts spent the week-end with Mr. Snape.

Miss Bertha Thompson was a visitor at the teacherage over the week-end.

A number of Countesses went to Bassano Monday evening to see the British passenger train, the Royal Scot.

DECK TO CHANGE MOTOR LICENSE YEAR

In an effort to have the Alberta government declare the auto license year to be from April 1 to March 31, instead of from January 1 to December 31, as at present, the Alberta Motor Association will shortly send all over Alberta copies of a petition to be presented to Hon. W. L. Walsh, Lieutenant-Governor of Alberta.

Decision to circulate the petition was made recently by the board of directors of the association at the regular meeting following action by the board to bring the matter before the legislature.

The petition will be placed in 2,000 garages, service stations and auto accessory stores throughout the province to be signed by auto owners.

A delegation of prominent motor association officials will present the petition.
